

Step 1: Install the Required Software

1. Download and install AWS Command Line from this link:

→ <https://aws.amazon.com/cli/>

→ <https://awscli.amazonaws.com/AWSCLIV2.msi> (download awscli directly)

2. Follow the installation steps (just click "Next" until finished)

Step 2: One-Time Setup

Open Command Prompt (Search for "cmd" in AWSCLIV2 install folder) and run this command:

```
aws configure
```

You will need to enter these details provided by Studio:

AWS Access Key ID	AKIA375GBKIKWYJ475IQ
AWS Secret Access Key	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
Default region name	ap-northeast-2
Default output format	json

Step 3: Download Files

Refer the the latest patch files path:

[localization string patch] === test file : CL_NUMBER 3136855 > Please try download.

bucket : eak-fco-localization-patch

- TH : th/3136855
- VN : vn/3136855

[external cdn asset] === test file : CL_NUMBER 3137872 > Please try download.

bucket : eak-fco-external-asset

- TH : th/3137872
- VN : vn/3137872

```
aws s3 ls s3://eak-fco-localization-patch/th/3136855/  
aws s3 sync s3://eak-fco-localization-patch/th/3136855/ C:\Downloads
```

```
C:\Program Files\Amazon\AWSCLI>aws s3 ls s3://eak-fco-localization-patch/th/3136855/  
2025-09-05 15:29:59      69 20250905_Localization_3136855.md5  
2025-09-05 15:29:59  486187 20250905_Localization_3136855.zip  
C:\Program Files\Amazon\AWSCLI>_
```

```
C:\Program Files\Amazon\AWSCLI>aws s3 sync s3://eak-fco-localization-patch/th/3136855/ D:\F04  
download: s3://eak-fco-localization-patch/th/3136855/20250905_Localization_3136855.md5 to D:\F04\20250905_Localization_3136855.md5  
download: s3://eak-fco-localization-patch/th/3136855/20250905_Localization_3136855.zip to D:\F04\20250905_Localization_3136855.zip  
C:\Program Files\Amazon\AWSCLI>_
```

What this does:

- Downloads all files from the cloud storage to your **C:\Downloads** folder
- Creates the folder automatically if it doesn't exist
- Only downloads new or updated files (saves time)

Step 4: Check Your Files

After the download finishes, open your **C:\Downloads** folder to see all the downloaded files.

Troubleshooting Tips

-  If you see "aws is not recognized":
Restart your computer after installing AWS CLI
-  If you see "access denied":
Check if you type incorrect key or region
-  If download is slow:
The files might be large - this is normal
